BDB 系列板式蝶阀

BDB Series of Plate Type Butterfly Valves

BDB系列板式蝶阀是根据国内外产品的特点开发的新一代板式蝶阀，是我国铸铁板式蝶阀的换代产品，阀体材料有Q235钢板和不锈钢，杜绝了过去用铸铁制造所造成的渗漏现象。阀体和阀片配合面经高级数控车床精密加工，渗漏量极小，性能优于同行业产品。蝶阀两端面配有断面为“工”字型密封圈，安全可靠，并配有专用异形螺栓。其中带管的板式蝶阀带一段您所需要的连管，它比传统的蝶阀减少一个泄露面，并节约一个法兰，经济实惠。蝶阀表面可根据用户要求采用喷漆、喷塑、热浸锌或电镀锌几种处理方式。

BDB series of plate type butterfly valves is a new generation of products developed to suits for demands of both abroad and home, is the replacement of casting iron valves. The valve body made of Q235 steel or stainless steel, so the penetration leakage caused by casting iron can be completely avoided. Valve body and valve disk matching through fine matching process provide very tiny penetration leakage by advanced numerical control lathe. The capability is in leading position. Both ends of valve equipped with “*” type of sealing ring provide safety and reliable, fitted by shaped bolts. The pipe is available for valves need piping connected and it’s a economic product by saving a flange. The surface can be treated by painting, painting with plastic, hot-dipped galvanization and galvanized.
